

MY GLA UCOMA SURVEY

A survey of eye doctors and patients with glaucoma* reveals there's **more than meets the eye.**

This survey was conducted by Allergan, an AbbVie Company.

Patients know

that glaucoma may cause blindness

Even though 3 in 4 are

concerned

they will lose some of their vision due to glaucoma

Approximately

40%
consider

glaucoma to be somewhat or not very serious

glaucoma impacts

patients on a **personal level**

85% worry

about a lifestyle changes like:

No more driving

Losing independence

67% fear

missing out on everyday moments such as:

Doing things they love

Enjoying time with loved ones

eye doctors

want glaucoma patients to...

take

medicine as prescribed

89% agree

tell

them when they are struggling with their medication

79% agree

ask

for more direction about how to take treatment

77% agree

Visit www.MyGlaucoma.com for more information.

*In 2019, an online survey was conducted by Kelton on behalf of Allergan to 500 glaucoma patients aged 40+ living in the U.S., with a margin of error of +/-4.4% and 100 physicians aged 18+ living in the U.S., with a margin of error of +/- 9.8%. Both patients and physicians were compensated.
